Activity Based Costing Example Questions Answers

“number of inspection during production” is a bit confusing because it might refer to both “the number of inspection during the whole production” in which case total inspection will be 8 (3 + 5) but if it is assumed that “the number of inspection during each of the production run” which I did, the total inspections would be 110 (13*5+15*3). My question is how do we avoid these ...
