## **History Common Paper February And**

Paper is a thin nonwoven material traditionally made from a combination of milled plant and textile fibres. It is primarily used for writing, artwork, and packaging; it is commonly white. The first papermaking process was documented in China during the Eastern Han period (25–220 AD) traditionally attributed to the court official Cai Lun. During the 8th century, Chinese papermaking spread to ...

The most common option is white coated paper, because if the coating cracks, the background colour is not apparent (although the colour difference will be noticeable in colour coatings). There is the matte or semi-matte finish, also involving the application of surface ink, although in this case the ink is less shinier.
